

# Miami Lib Finder & Tracker Projects

Client: Matt Benzing, BEST Librarian

Tech Contact: Meng Qu, Technical Librarian

M3 Mapper Contact: Anjali Purayil

## Considerations:

1. Confer with the M3: Miami Mapper project. The foundations for the library projects have been established in the M3 Project, sponsored by Dr. Vaskar Chowdhury. There is a poster outside of Dr. Chowdhury's office that will give you additional detail.
2. I suggest both the Lib Finder and Lib Tracker teams confer amongst yourselves after the first requirements sessions are completed and you have a good idea of what your scope is. You may find insights from each other and identify any risks that one project may pose to the other, etc.
3. Important - Next steps, meet with the client and outline any technical constraints because it would be deployed for a Miami department.

IMPORTANT: find out if it will be supported by MUIT. If so, there are technical constraints to consider. NO FOR NOW.
